Beorn's opinion on the affects of stats not including skills and spells.

-----

### 1) STRENGTH - affects +dam

001-025 str = +dam / 1 str

026-050 str = +dam / 2 str

051-100 str = +dam / 3 str

101-200 str = +dam / 5 str

201-??? str = +dam / 7 str

(with a couple irregularities)

-----

### 2) CONSTITUTION - affects health regen / hp gain / prevents

% regen:

00-10 = 2%

11-15 = 3%

16-20 = 4%

21-25 = 5%

26-30 = 6%

31-40 = 7%

41-60 = 8%

61-80 = 9%

81+ = 10%

-----

### 3) DEXTERITY - affects +hit

001-025 dex = +hit / 1 dex

026-050 dex = +hit / 2 dex

051-100 dex = +hit / 3 dex

101-200 dex = +hit / 5 dex

201-300 dex = +hit / 7 dex

(with a couple irregularities)

-----

### 4) AGILITY - affects quickness / end regen / end gain

Somewhere in multiples of three, this is one I'm not sure about.

% regen:

00-10 = 2%

11-15 = 3%

16-20 = 4%

21-25 = 5%
