

- One time "no practice loss" adaptation deadline has been reached; thus, this has been removed from the game.
- Reminder - the one time "no practice loss" adaptation offer ends today, August 1st. I will leave it up until midnight PST. =)
- Keiiken has been revamped into a sweet new prevention.
- Tame now improves pet stats beyond 300%, but its overall scaling has been reduced.
- The warlock wrinkle now gains additional charges based on intellect and constitution.
- Improved the katar of subtle cruelty's critical chance.
- Changed staff of the gate's prevention type to be easier to read at a glance (all base weapons read "item creation").
- Some changes to insanity and havoc: activation costs have been reduced; scaling slightly reduced (especially when stacking both skills together); failure rate sharply reduced.
- Pets can no longer use sentinel dominance.
